

Seeking Novel Technologies

CEDARS-SINAI TECHNOLOGY VENTURES

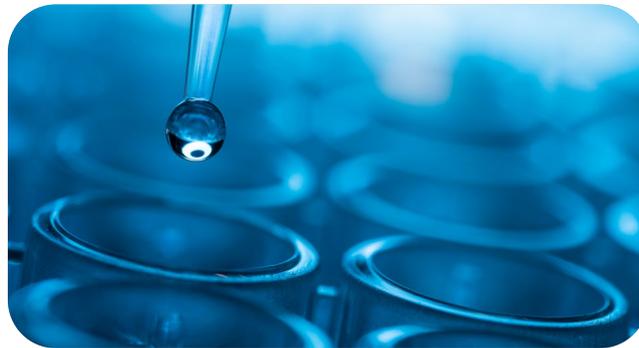

The Technology Ventures team is seeking validated technologies in the following categories:

DIAGNOSTICS

Validated biomarker discoveries utilizing DNA sequencing, RNA expression, protein-based assays and cell-based tests

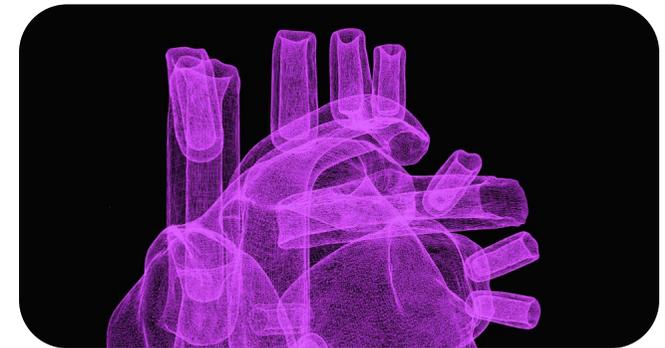

AREAS: Oncology, rare disorders

THERAPEUTICS

Validated therapeutic targets with identified hit small molecule compounds or cell therapies

AREA: Oncology

DIGITAL MEDICINE

Clinically validated software and hardware to diagnose, support decisions, monitor patients, and treat, manage and prevent disease

AREAS: Cardiovascular, oncology and GI

If you are a research institution, university, accelerator or early-stage startup company with a technology that meets these criteria, we would love to partner with you! If your project is selected, we will work with you to accelerate the development of your technology, with the goal of bringing it to market. We can provide the following resources: ✦ clinical expertise ✦ product development capabilities ✦ clinical trial design and administration ✦ access to diverse patient samples ✦ pre-seed and seed-stage funding.

CONTACT US:

Please send information about your technology to pamela.collingwood@cshs.org and janny.hsu@cshs.org
