Aims and Characteristics

Physiotherapy (PT) is the art and science of rehabilitation, preventing injuries and disabilities, restoring independence and promoting a maximal level of function in individuals with physical and psychological disorders. Physiotherapists make use of multiple physical means to provide patient care. Examples include cryotherapy, electrotherapy, exercise therapy, heat therapy, hydrotherapy, manual therapy and traction, as well as assistive devices and artificial limbs to help individuals regain maximal functional potential. Physiotherapists contribute to the multidisciplinary team through patient evaluation, treatment planning and delivery, education, research and consultation in hospitals, clinics, industry and the community.

Aims and Characteristics

Physiotherapy (PT) is the art and science of rehabilitation, preventing injuries and disabilities, restoring independence and promoting a maximal level of function in individuals with physical and psychological disorders. Physiotherapists make use of multiple physical means to provide patient care. Examples include cryotherapy, electrotherapy, exercise therapy, heat therapy, hydrotherapy, manual therapy and traction, as well as assistive devices and artificial limbs to help individuals regain maximal functional potential. Physiotherapists contribute to the multidisciplinary team through patient evaluation, treatment planning and delivery, education, research and consultation in hospitals, clinics, industry and the community.

Programme Aims

The overall aim of the MPT programme is to equip students to become qualified physiotherapists who can practice physiotherapy autonomously safely and effectively in different settings, and to meet the health care needs of society.

MPT students are developed into lifelong learners and critical consumers of the professional and scientific health care literature. Graduates possess the ability to engage in research and to critically analyse and integrate information from different sources into clinical practice. By acquiring a strong sense of professional commitment, our graduates are able to provide high quality physiotherapy services and contribute to the advancement of the rehabilitation profession.

Characteristics

The curriculum is based upon a solid theoretical framework. Students learn and develop the ability to link theory to practice. The curriculum provides opportunities

- After submitting an application on e-admission system, applicants are required to submit supporting documents for prerequisite courses: Human Anatomy and Human Physiology, e.g. copies of relevant course syllabuses and transcripts, via another online system: <https://www.polyu.edu.hk/pfs2/index.php/324392?lang=en> (The system will be activated during the application period.)

Master in Occupational Therapy

Introduction Recognition and Prospects Curriculum Entrance Requirements Other Information Enquiries

Student Message Additional Documents Required Info Seminar

Aims and Characteristics

Occupational Therapy (OT) is the use of comprehensive assessment and treatment to help clients across the lifespan achieve their optimum level of functioning. Common OT interventions include helping people who have physical, mental or cognitive disabilities to restore their roles in their families, workplaces and the communities. Through therapeutic activities, clients' functioning can be developed, recovered or maintained. Occupational therapists focus on adapting environments, eliminating environmental barriers, modifying tasks, teaching skills, educating clients and their families to maximise independence, participate in daily meaningful activities and improve their quality of life.

Specialty areas served by occupational therapists include paediatric, physical, geriatric, psychiatric, cognitive and vocational fields.

Programme Aims

The MOT programme aims to train competent, entry level occupational therapists. Graduates can provide occupational therapy in a fully competent way and will take up leading roles in diversified, client-centred services in the community. Our programme also prepares students with good administrative, managerial and communication skills, as critical thinkers and lifelong learners in helping and educating clients, the public and the next generation of therapists.

Characteristics

Students are of mature age and have background knowledge in human physiology, anatomy and other general education subjects through their undergraduate training. Because of their more advanced age and richer life experiences, they should have more stable personalities and higher level communication skills.

- Upload the Supporting Documents of Human Anatomy and Human Physiology
- Upload other achievement Documents

Master in Physiotherapy Programme (Intake of 2021/22)

After submitting application on e-Admission system, please fill in the following information and upload the relevant supporting documents in order to complete your application.

Please be reminded that the maximum file size for uploading each document is 5MB and the file format should be PDF file only.

Personal Information Collection Statement

Disclaimer:
If the information shown is not related to the log-in user, the user should inform the Department of Rehabilitation Sciences, PolyU and should not attempt to disclose, enter or disseminate the information in any form or by any means to any other person. If you encounter any problems, please email us at rs.department@polyu.edu.hk.

Web Content Accessibility:
If you find any aspect of this website inaccessible or encounter any difficulty in use, please contact us at rs.department@polyu.edu.hk.

There are 18 questions in this form.

Part 1: Applicant's Information

★ Name of Applicant:
(MUST be the same with PolyU e-Admission system, e.g. CHAN Tai Man)

★ Application No.:
(MUST be the same with PolyU e-Admission system, e.g. 202123456)

★ Only numbers may be entered in this field.

★ E-mail address:

Part 2: Human Anatomy

★ Please select
Choose one of the following answers

☐ I have studied Human Anatomy (3 credits or equivalent) in

☐ I haven't fulfilled the human anatomy course requirement during application period. I will present the transcripts/certificates of the human anatomy course during programme registration. I thereby provide a proof of enrolment of an acceptable human anatomy course.

Part 3: Human Physiology

★ Please select
Choose one of the following answers

☐ I have studied Human Physiology (3 credits or equivalent) in

☐ I haven't fulfilled the human physiology course requirement during application period. I will present the transcripts/certificates of the human physiology course during programme registration. I thereby provide a proof of enrolment of an acceptable human physiology course.

Part 4: Important points to note

★

(1) Submission of the above documents does not imply that you have met the admission requirements on human anatomy/ physiology courses. The Department reserves the right to assess eligibility of the courses. In the event of any disputes, the Department reserves the right of the final decision.

(2) In the event of repeated submission, the latest submission will prevail.

(3) The information collected from you will be used for the purpose of processing your application only. Before submission, you are obligated to read through the Personal Information Collection Statement of Poly U. (<https://www.polyu.edu.hk/ar/web/en/pics/index.html>)

Choose one of the following answers

☐ I confirm that I have read and understood the above information before submission.

Submit

2 Separate system of Department of RS

Applicants are required to **upload supporting documents of Human Anatomy and Human Physiology** to a separate system of RS before application deadline.

Please note that application will be regarded as incomplete if the applicant fails to provide the supporting documents on the above systems before the application deadline.

It is the applicant's responsibility to make sure that all **supporting documents**, including **but not limited** to supporting documents of Human Anatomy and Human Physiology, and so on, must be uploaded/submitted to the respective system by the timeframe as mentioned above.
