

Outstanding Student, Faculty of Engineering 2021

ZHANG Caiqi

BSc (Hons) in Computing &
Minor in Applied Mathematics

Computer science and artificial intelligence are now impacting our everyday lives and indeed have drastically changed our world. Before I joined PolyU in 2018, I was a layman and knew nothing about computing, not to mention artificial intelligence. I have equipped myself with a lot of professional knowledge in this hot area through studying at PolyU, making me feel confident to embrace the digital age and challenge. For me, PolyU is a place that provides me with everything I need for my university life: professional programmes, student clubs' activities, volunteer services, exchange, internships, and research support. It is like a fertile ground where anyone can flourish with their own efforts!

Nelson Mandela once said, "Education is the most powerful weapon which you can use to change the world." PolyU has equipped me with the capabilities to make a difference and provided me with the opportunities to serve the community. During the three service trips to the underdeveloped areas, I have witnessed the poverty and inequality there. Therefore, I aspire to use technology to help improve people's lives. Studying at PolyU is an excellent starting point for my career, and I hope to make some significant impact on society in the future!
