About MGF

MGF Sourcing is an independent US-led global sourcing company founded in 1970. We focus on US-based specialty apparel retailers and, with our strong track record in apparel sourcing and best-in-class technical capabilities, have developed a long-standing reputation as a reliable and trustworthy partner. We offer end-to-end services from design, product development, sourcing, quality assurance, and trade compliance to global logistics. We've developed a unique way of working that helps us deliver quality merchandise for our customers on time, at cost, and in compliance. Our values form the foundation of our approach to business and have led us to become a company with over $1 billion USD in annual sales. Headquartered in Columbus, Ohio, the company also maintains offices in Bangladesh, China, Hong Kong, Indonesia, India, Korea, Sri Lanka, and Vietnam. With more than 550 associates in 9 countries, our global team collaborates across categories and borders, supporting innovation and increasing flexibility for our customers. Our team is passionate about leveraging cutting-edge technology to enhance our design processes and deliver exceptional results to our clients.

About the role

We are seeking a talented and motivated senior student from a design school to join our team as a Summer Intern. The successful candidate will <u>work on a project to evaluate various AI tools for the design process and provide recommendations on how these tools can be utilized to increase productivity within our design team</u>.

How your day looks like at MGF:

- Conduct a comprehensive evaluation of selected AI tools used in the design process.
- Analyze the strengths and weaknesses of each tool in relation to our design needs.
- Develop a framework for assessing the effectiveness of AI tools in enhancing design productivity.
- Collaborate with the design team to understand their workflow and identify areas where AI tools can be integrated.
- Provide detailed recommendations and a final report on the best AI tools for our design team.
- Present findings and recommendations to the design team and management.

What You'll need:

- Academic background in Fashion Design, Fashion & Textile or any related disciplines is preferred
- Strong interest in AI and its applications in the design field
- Excellent analytical and problem-solving skills.
- Proficiency in design software and tools.
- Ability to work independently and as part of a team.
- Strong communication and presentation skills.
- Prior experience with AI tools is a plus but not required.

The Key Competencies you should have:

- Be Fast & Agile
- Collaborate
- Creativity/Innovation

- Teamwork
