

## About us

Shima Seiki provides design systems capable of handling every operation required in the apparel industry ranging from product planning and production management to sales promotion. They help reduce time and costs in every stage of the production process, such as planning and sample development, and thereby contribute significantly to improving the business efficiency of the apparel industry. Shima Seiki offers a total fashion system by drawing on its design system and brings change to the apparel industry by significantly streamlining planning and production processes. In recent years, the company has offered manufacturing applying the total fashion system to various fields other than apparel, such as interior, automotive, aerospace, and industrial materials.

The company's overseas sales account for about 80% of its total sales, which involves Italy, the center of the fashion industry, China, the largest knit production site in the world, and Bangladesh and ASEAN countries that are expanding as new production bases. Centering on local companies in China, Hong Kong, Vietnam, Italy, the United Kingdom, and the United States, we have built service networks in each country to roll out our businesses and services globally.
