Subject Code	BME3S02			
Subject Title	Assistive Technologies: Service learning towards the elderly and disabled			
Hosting Dept	Interdisciplinary Division of Biomedical Engineering			
Level	3			
Class Quota	40			
Medium of Instruction	English			
Subject Duration	Semester 1+ Semester 2			
Teaching Staff	Dr. Eric Tam			
Target Students	GUR for students with engineering, health care & design background			
Pre-requisites	Nil			
Selection of Students Required?	No			
Subject Synopsis	https://www.polyu.edu.hk/bme/f/page/98/BME3S02_20161229.pdf			
Service Project				
What will students do to serve?	Service learning projects involving real-world clients will be organized through special schools for the people with disabilities, NGOs and other rehabilitation related organizations. During direct service rendering, students will be working in groups to tackle a specific need of the client that is presented to them. Students then will utilize their learned skills to analyse the situation and propose a solution. Whenever feasible, the students will construct the assistive device for the user.  Examples of the projects include designing a device to facilitate daily activities; accessing computer; playing a musical instrument, etc. The outcome of these projects can also include conceptual designs of a complex device or a working prototype.			
Whom will students serve?	Disabled students and older adults			
Where will students serve?				
	$\boxtimes$	Hong Kong	District:	
		Chinese mainland	Province:	
			City:	
		Taiwan		
		Macau		

	Overseas	Country:	
		City:	
When will students serve?	Depending on collabora	ting agencies	
Fee payable by students	N/A
