<b>What will students do to serve?</b>	The service-learning project will focus on improving the electricity supply and energy usage for the low-income families by constructing or renovating the solar energy system. In the service-learning project, you will work in groups with the local university students. After having a site-visit of low-income / rural families to learn about their living situation in everyday life, you need to develop an energy solution based on solar energy and install basic electrical appliances to help the villagers to improve their quality of life.
<b>Whom will students serve?</b>	Underprivileged areas in developing countries or regions such as Kigali, Rwanda
