QF Level 4 (HKQF 18 credits)

QR Registration No.: 21/000505/L4

Validity period:

From 1 September 2021

Reaccredited for a further five years from 30 May 2021 by PolyU

About the course

We have revised and expanded our programme to bring you three sub-modules that provide a strong foundation in infectious disease, followed by a detailed review of the latest infection control practices. Finally, participants will be introduced to the challenges of emerging and re-emerging infectious diseases, outbreaks of infection, tropical diseases, and the global crisis of antimicrobial resistance.

Testimonials about our course

A well-structured program providing learners with a comprehensive understanding on infectious diseases and infection control. The information is up-to-date, practical and interesting. Highly recommend it to healthcare colleagues.

Update infection control knowledge and tutor experience sharing very useful applications to clinical work. This course is very practical to me. I am willing to recommend this course to others!

DON'T MISS this opportunity to learn from over forty experts in the field of infectious diseases and infection control!!!
