

THE HONG KONG
POLYTECHNIC UNIVERSITY
香港理工大學

DEPARTMENT OF
CIVIL AND ENVIRONMENTAL ENGINEERING
土木及環境工程學系

BEng (Hons) in Civil Engineering (Full-time)

JUPAS Code: JS3739

The infrastructure development in Hong Kong and Mainland China generates an **increasing demand** for **well-trained civil engineers**.

This programme is designed to provide students with a broad-based and high-quality interdisciplinary education in areas of environmental, geotechnical, hydraulic, structural and transportation engineering as well as construction management. It aims to **nurture all-round civil engineering graduates** who are ready to work on projects with commercial, social, legal and political complexities.

Attractive Features

- Four-year full-time **comprehensive programme**.
- Opportunity to join **exchange programmes** for 1-2 semesters at internationally famed universities.
- **Practical training** modules in the technologically advanced Industrial Centre of the University.
- **Summer placement** in Hong Kong, Mainland China or overseas.

Entry Scholarship

Based on the “best 5” HKDSE subjects, the Department will identify the most outstanding HKDSE admittee of our undergraduate programmes to grant a one-off entry scholarship of HK\$50,000. For details, please [click here](#) or scan the QR code.

Notes:

In case two or more students obtain the same HKDSE score, the amount of the award will be equally shared by the admittees.

Scholarship

Professional Recognition

Full accreditation has been granted by **The Hong Kong Institution of Engineers (HKIE)**. Graduates of this programme are expected to be qualified for **Corporate Membership of HKIE** after appropriate trainings. Graduates are eligible to join **Scheme A training of HKIE** in the disciplines of Civil, Environmental, Geotechnical, Structural and Logistics & Transportation*.
