

## PolyU scholars ranked among top 2% of scientists in the world

A total of 163 scholars from PolyU have been ranked among the world's top 2% most-cited scientists. The scholars were named in the "Updated science-wide author databases of standardised citation indicators", compiled by Stanford University where a research team, led by Prof. John Ioannidis, created the database of close to 160,000 top scientists across the world on the basis of standardised citation indicators. The scientists were grouped into 22 subject fields and 176 sub-fields using the indicators, which included information on citations, an individual's scientific research output, co-authorship and a composite indicator for career-long citation impact up to the end of 2019.

PolyU had the second most scientists included on the list among Hong Kong's universities. Twenty PolyU scholars were ranked among the top 50 scholars on the list, which is the most among local universities. PolyU also had the highest number of top 2% scientists in Hong Kong in the fields of Building and Construction (15) and Civil Engineering (12).

	Name of Researcher	Department	Subject Field	Rank in Field	Field Size
1	Poon, Chi Sun	Department of Civil and Environmental Engineering	Building & Construction	5	27014
2	Cheng, T. C. E.	Department of Logistics and Maritime Studies	Operations Research	5	23455
3	Law, Rob	School of Hotel and Tourism Management	Sport, Leisure & Tourism	5	6302
