

Wong Tit-shing Student Exchange Scholarship

Exchange Learning Report

Name: WANG Jiayue

Department: EIE

Country: Singapore

Host Institution: National University of Singapore

Exchange Period: 5 January 2023 to 8 May 2023

I. Learning experience on this trip

Through this exchange in NUS, I improve my professional skill in academic study on electronic and information engineering field. Singapore is an advanced country with high technology. NUS is also an excellent university, especially in the field of my major. During this exchange, I explored the new knowledge in the field of communication, computer network, database system and feedback control. I learned the cutting-edge technology and the new development trends in these areas.

The learning mode in NUS is also innovative. In the lectures, professors are willing to interact with students, trying to help students engaging deeply in the classes. If students have questions, they can just raise the hands and ask question to professor. The professors taught students more on how to think deeply. I really like this learning and teaching mode.

II. Career aspiration

My exchange study in NUS widened my thinking about future and career path. I firmed my career area in communication technology field after I taking one of modules in communication system. The professor not only taught us many modern communication techniques, but also hold a guest lecture regarding to future career. This guest lecture was an Industry Talk by Underwriters Laboratories. The speaker introduced the communication technology industry, and I gained some new insight towards this career path.

I also got some chances talking and learn from to some of my local friends who have the same major as me. They all are very excellent students. From them, I know the current working situation for information technology industry in Singapore, which giving me some thinking on my future work.

III. Views on other culture

This exchange programme provides me with a golden chance to learn new culture and broaden my horizon. I am an outgoing person, really love to explore new cultures. When exchanging to Singapore, I experienced different cultures and shaped new world view. Singapore is a country with multiculture, including both eastern and western cultures. It is worth learning and praise how Singapore mixes multicultures together quite well.

I participated into many student activities organized by NUS students while exchanging in Singapore. The activities cover many fields, such as cultures, sports, and social activities. Almost all the fields have specific student clubs and welcome exchange student to join in. Therefore, I join many activities which really enriched my exchange life in NUS. Also, I lived in NUS on-campus student hall. Therefore, I got many chances interacting with Singapore local friends and build very great relationship with them.

Besides, I also communicate and make friends with many exchange students from all over the world and different universities during my exchange study. When talking and interacting with them, I also practice my English-speaking skills. Exchange programme let me experience a new campus life and explore a new country. I gained a lot from this exchange programme.

IV. Detailed study schedule in the exchange-out institution

	MON	TUE	WED	THU	FRI
0900					EE3131C PTUT [01] LT3
1000	EE4204 PLEC [01] LT2	EE3131C PLEC [01] LT3	EE3331C PLEC [01] LT1	CS2107 LEC [1] UT-AUD2	
1100					CS2107 TUT [14] COM3-01-23 Weeks 3-13
1200		IT2002 LEC [1] LT15			
1300	EC2104 TUT [W01] AS3-0214 Weeks 3-13		EE4204 PTUT [01] LT2		
1400					EE3331C PTUT [01] LT1
1500					
1600		IT2002 TUT [1] COM1-0201 Weeks 3-13	EC2104 LEC [1] LT9		
1700					

I registered 6 subjects in this exchange semester in NUS, which not only include my major course, but also my minor course. In order to fulfil graduation requirements, I chose to take two subjects from my major compulsory courses, three subjects from major elective courses, and one subject from my minor courses.

My classes uniformly distributed on Monday to Friday. Therefore, on weekdays, I usually take my lectures and tutorials. If there is no class, I will study in the library to review. On weekends, I take some time to finish subjects' assignments and prepare for next week classes. If there are upcoming exams, I will also revise them on weekends as there are more large blocks of time. The study schedule in NUS is quite fulfilling for me.
